

# SUNON WORLD LEADER IN THERMAL MANAGEMENT

Sunon Fans are the products you need to remove heat from your electronic devices. Since 1984 we at Gelec have used Sunon fans to cool large and small devices efficiently and effectively.

## Go bespoke to optimise your design

Gelec's 40+ year relationship with Sunon and our experience within the electronics industry means we can work with you to develop bespoke fans to your exact requirements. Having perfect length wiring, bespoke connectors or fan housings in place before the fans reach your production line removes time and complexity from your production process.

## WAREHOUSING TO RELEASE CAPITAL & REDUCE COSTS

Bulk ordering to achieve economies of scale pricing often comes with two issues: tied up capital and storage requirements. When you order with Gelec, we will store your Sunon fans\* and deliver them whenever and wherever you need them, anywhere around the world. We only invoice you for the fans when you take delivery. With options around customised and recyclable packaging, and the removal of single-use plastics, you get the perfect logistics solution for your needs.

\*Subject to a maximum time period.

### ABOUT SUNON

Since 1980 Sunon has focused on the research and development of core motor technology. In the fields of motors, fans, cooling modules, ventilation fans, and air purification solutions, Sunon leads the way on innovation.

Sunon developed the world's first MagLev motor fan – the smallest and thinnest magnetic levitation motor fan product. The company has become the best thermal solution provider for clients across various industries, such as IT, automobile electronics, optical electronics, and network communication applications.

### ABOUT GELEC

Founded in 1975, Gelec has earned its reputation as a respected manufacturer and global supplier of top quality and competitively-priced electrical components.

Gelec has a highly reliable and professional team delivering a wide variety of products to even the most exacting requirements.

Gelec has offices and warehousing in the UK, China and Hong Kong dedicated to the support of customers throughout Europe, Asia and America.
