

YOUR COMPLETE LOGISTICS SOLUTION

When ordering components in bulk to achieve cost savings and stability, you then need a logistics solution that delivers efficiencies and, ideally, makes further savings for you. At Gelec, we believe we have the complete logistics solution to manage your component supply.

WAREHOUSING AROUND THE WORLD

Multiple warehouse facilities around the world help us to effectively manage your component needs, optimising cost/availability for you.

- Regular and call-off delivery options
- Minimised transport and shipping costs, particularly for Asia/Americas
- Stock consolidation and multi-site deliveries

RELEASING CAPITAL

Bulk orders usually tie up capital for extended periods of time – but not with Gelec. Whilst tooling (and some other costs) need to be paid early, we only charge for your components when we deliver, releasing capital and helping cashflow.

OPTIMISED FREIGHT MANAGEMENT

When working with multiple clients, we can manage freight movement to optimise costs and pass those savings to you. If you urgently need stock, we can switch to air freight to ensure you have the components on the production line when you need them. We take full responsibility to the point of collection/delivery.

A SELF-MANAGING PARTNER

By monitoring stock levels, consumption patterns and production lead times, we can ensure uninterrupted supply and maximised production efficiency.
