

SUNON WORLD LEADER IN THERMAL MANAGEMENT

Sunon fans are the products you need when your device requires active cooling. Since 1984 we at Gelec have used Sunon fans to provide efficient, reliable and cost-effective thermal solutions.

Customise to optimise your design

Gelec's 40+ year relationship with Sunon and our experience within the electronics industry means we are your ideal partner for selecting the right product to solve your thermal management needs. Customisations such as a change to lead length and terminating with a connector of your choice removes the need for additional processing, and instead fans can be used directly on the assembly line.

Gelec

COMPONENTS WHEN YOU NEED THEM

Ordering in bulk delivers unit cost savings through economies of scale. But you then have to hold that stock, taking up space and incurring costs.

Gelec can warehouse your components in the UK or Hong Kong and deliver to your production facilities, wherever in the world they are, to an agreed schedule. If you find you need to alter that schedule, we can do that quickly and easily.

Making use of our storage facilities removes costs and improves efficiency for you.

ABOUT SUNON

Since 1980 Sunon has focused on the research and development of core motor technology. In the fields of motors, fans, cooling modules, ventilation fans, and air purification solutions, Sunon leads the way on innovation.

Sunon developed the world's first MagLev motor fan – the smallest and thinnest magnetic levitation motor fan product. The company has become the best thermal solution provider for clients across various industries, such as IT, automobile electronics, optical electronics, and network communication applications.

ABOUT GELEC

Founded in 1975, Gelec has earned its reputation as a respected global supplier of high quality and competitively-priced electro-mechanical components.

Gelec has a highly reliable and professional team delivering a wide variety of products to even the most exacting requirements.

Gelec has offices and warehousing in the UK, China and Hong Kong dedicated to the support of customers throughout Europe, Asia and the Americas.
